

West Nile Virus National Surveillance Report English Edition

August 3, 2008 to August 9, 2008 (Week 32)

Canada

Human:

During the week 32, one (1) new human case with West Nile virus (WNV) infection has been reported to the Public Health Agency of Canada (PHAC). As of week 32, a total of three (3) human WNV cases from Ontario, Manitoba and Saskatchewan have been reported to the PHAC. Of them, two (67%) were classified as West Nile Non-Neurological Syndrome, and one (33%) as unclassified. No death has been reported.

Bird:

As of week 32, a total of 714 dead birds have been tested by the Canadian Cooperative Wildlife Health Centre, of which 32 (5%) were positive for WNV. All thirty-two (32) positive birds were reported in Ontario [Niagara (1), Lambton (1), North Bay (8), Sudbury&District (2), Thunder Bay (1), Eastern Ontario (5), Haliburton (2), Renfrew county (2), Peterborough (1), Simcoe Muskoka (1), Wellington-Dufferin-Guelph (1), Peel (1), Ottawa Public (2), Durham (2), Leeds Grenville&Lanark (1) and Windsor-Essex (1)]. The positive birds were American Crows (94%) and Blue Jay (6%).

Mosquito:

As of week 32, forty-two (42) positive mosquito pools with WNV infection have been identified in Ontario [Brant County (1), Peel (2), Toronto (2), Windsor-Essex (3), and York Region (1)], Manitoba [Assiniboine (22), Brandon (1), Interlake (3), Winnipeg (1)], and Saskatchewan [Sun Country (6)].

Domestic Animal:

No horses with WNV infection have been reported to the Canadian Food Inspection Agency (CFIA) since the start of this season.

National WNV surveillance data and maps can be found on the PHAC web site at:

<http://www.phac-aspc.gc.ca/wnv-vwn/index.html>

Provinces/Territories: Detailed WNV information can be accessed through the Links section on the PHAC WNV web site.

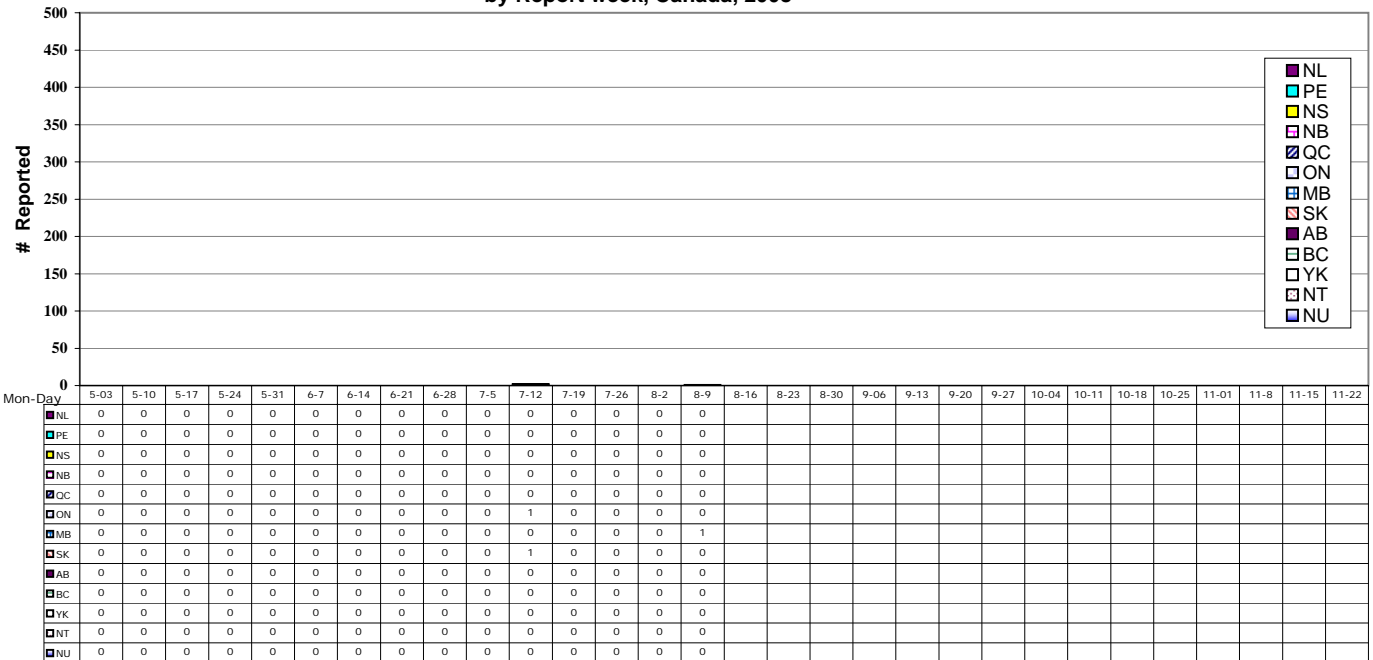

United States

Human:

As of 12 August 2008, one hundred sixty-eight (168) human WNV clinical cases and thirty (30) presumptively positive viremic blood donors have been reported to the Centers for Disease Control and Prevention (CDC) in the U.S. Of the 168 cases, 73 (43%) were reported as West Nile meningitis or encephalitis (neuroinvasive disease) and 89 (53%) as West Nile fever, and 6 (4%) were clinical unspecified. Two (2) deaths have been reported.

States: Detailed State information can be accessed through the CDC web site: <http://www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm>

WNV Human Clinical Cases and Asymptomatic Infections, by Province/Territory, by Report week, Canada, 2008

Abbreviations: Newfoundland & Labrador (NL), Prince Edward Island (PE), New Brunswick (NB), Nova Scotia (NS), Quebec (QC), Ontario (ON), Manitoba (MB), Saskatchewan (SK), Alberta (AB), British Columbia (BC), Yukon Territory (YK), Northwest Territories (NT), Nunavut (NU)

**WNV Human Clinical Cases and Asymptomatic Infections for the Current Report Week and Year-to-Date,
by Province/Territory, Canada, 2008**

¹ Total clinical cases is the sum of both probable and confirmed: WNNS, WN Non-NS and Unclassified / Unspecified

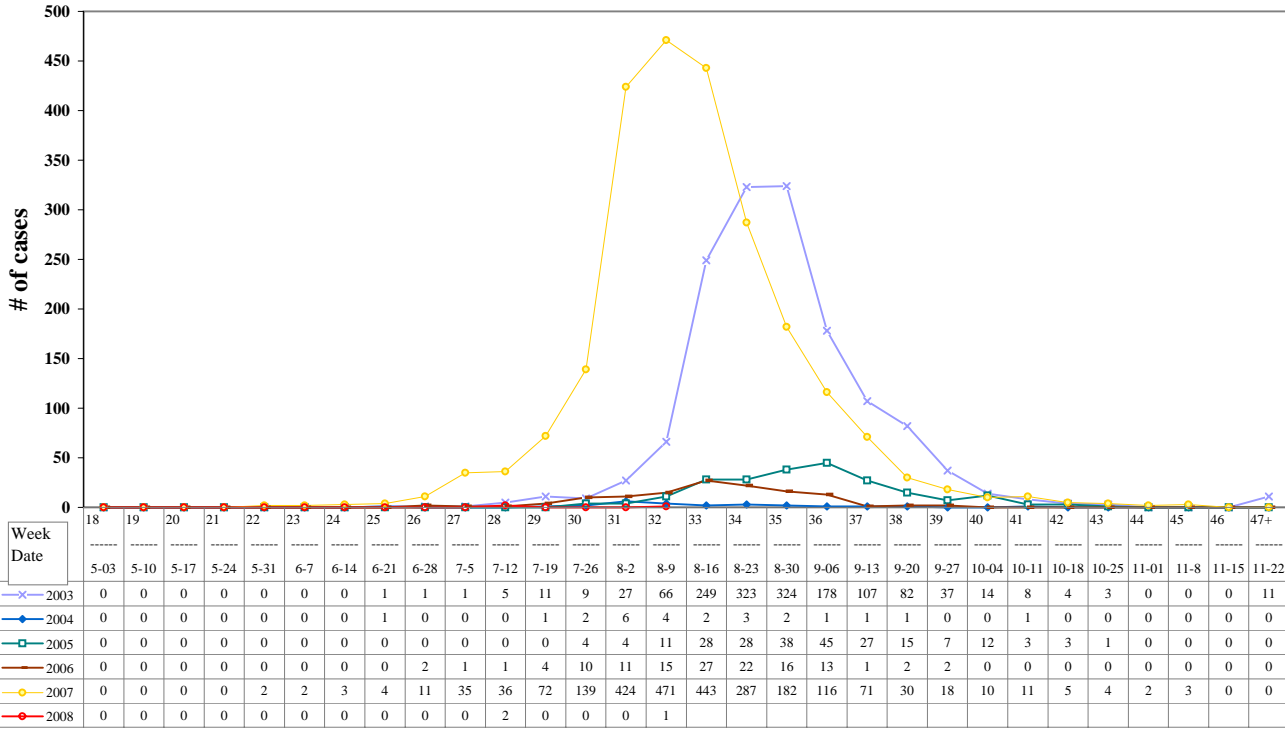

² Likely related to travel outside the province / territory

³ Satisfies West Nile virus diagnostic test criteria IN THE ABSENCE of clinical criteria. This category could include asymptomatic blood donors whose blood is screened using a Nucleic Acid Amplification Test (NAT), by Blood Operators (i.e. Canadian Blood Services or Hema-Quebec) and is subsequently brought to the attention of public health officials. Blood Operators in Canada perform a supplementary WN virus-specific NAT following any positive donor screen test result.

Details on human case definitions can be seen on the PHAC West Nile virus surveillance web site:

http://www.phac-aspc.gc.ca/wnv-vwn/hmncasedef_e.html

WNV Human Clinical Cases and Asymptomatic Infections in Canada, 2003 to 2008

Report Week by Episode date ⁴

Cumulative number of WNV positive mosquito pools tested by week, by province/territory, in Canada⁵ 2008

Provinces/Territories	Cumulative Total Tested by Report Week																													
	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46

⁴ Episode date could include one of the following: symptom onset date, diagnosis date, lab sample date, or reporting date.

⁵ Detailed WNV mosquito surveillance data can be accessed through provincial/territorial web sites.

⁶ These provinces are not conducting mosquito surveillance as part of their WNV surveillance program in 2008.
