

West Nile Virus National Surveillance Report English Edition

August 17, 2008 to August 23, 2008 (Week 34)

Human:

During the week 34, four (4) new human cases with West Nile virus (WNV) infection have been reported to the Public Health Agency of Canada (PHAC). As of week 34, a total of eleven (11) human WNV cases [Ontario (1), Manitoba (5), Saskatchewan (4), and Alberta (1)] have been reported to the PHAC. Of them, 9 (82%) were classified as West Nile Non-Neurological Syndrome, and two (18%) as unclassified. No death has been reported. There has been one (1) travel related case reported in Alberta.

Bird:

As of week 34, a total of 814 dead birds have been tested by the Canadian Cooperative Wildlife Health Centre, of which 75 (9%) were positive for WNV. All seventy-five (75) positive birds were reported in Ontario [Chatham-Kent (1), Niagara (4), Lambton (1), North Bay (8), Sudbury&District (3), Thunder Bay (1), Eastern Ontario (5), Haliburton (2), Halton (9), Hamilton (5), Renfrew county (2), Peterborough (3), Simcoe Muskoka (2), Wellington-Dufferin-Guelph (1), Peel (4), Ottawa Public (12), Oxford County (1), Durham (7), Leeds Grenville&Lanark (1), Windsor-Essex (1), Middlesex-London (1) and Waterloo (1)]. The positive birds were American Crows (91%) and Blue Jay (9%).

Mosquito:

As of week 34, eighty-seven (87) positive mosquito pools with WNV infection have been identified in Ontario [Brant County (1), Halton (2), Hamilton (3), Peel (15), Toronto (3), Windsor-Essex (4), and York Region (4)], Manitoba [Assiniboine (26), Brandon (4), Interlake (3), North Eastman (1) and Winnipeg (2)], and Saskatchewan [Sun Country (16), Sunrise (1), Saskatoon (1), and Regina (1)].

Domestic Animal:

One horse with WNV infection in Ontario has been reported since the start of this season.

National WNV surveillance data and maps can be found on the PHAC web site at:

<http://www.phac-aspc.gc.ca/wnv-vwn/index.html>

Provinces/Territories: Detailed WNV information can be accessed through the Links section on the PHAC WNV web site.

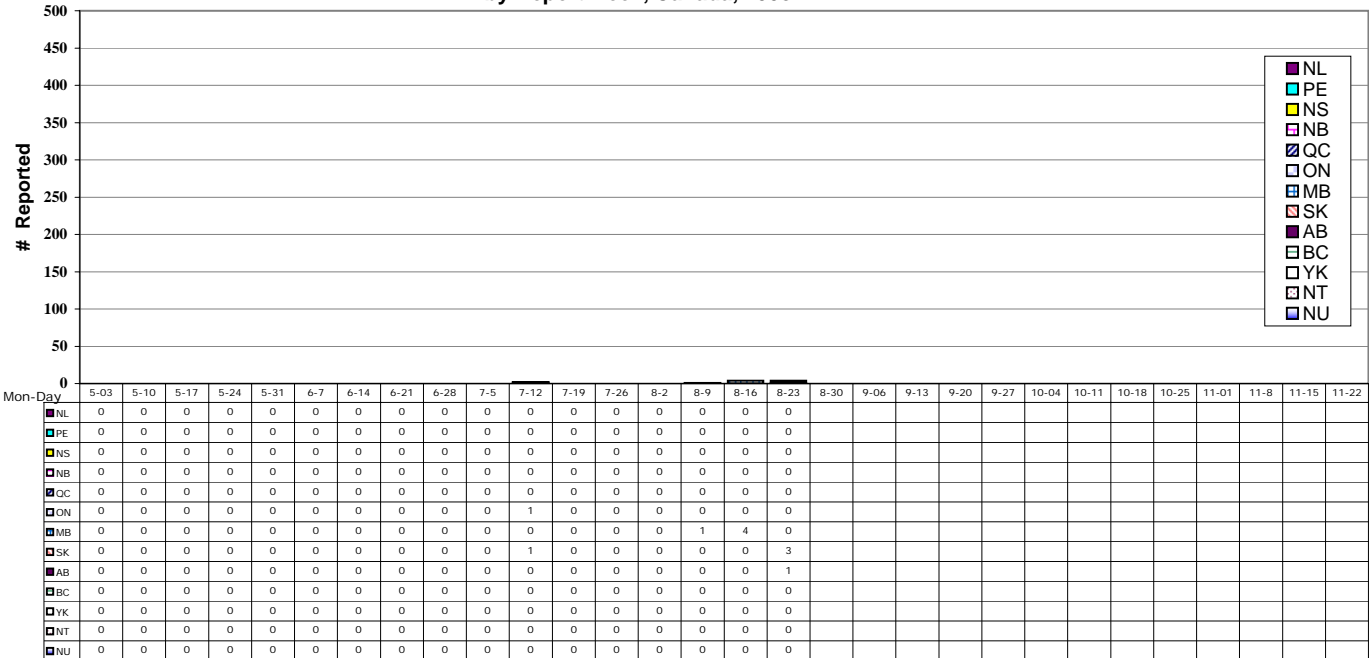

United States

Human:

As of 26 August 2008, three hundreds forty-two (342) human WNV clinical cases and fifty-four (54) presumptively positive viremic blood donors have been reported to the Centers for Disease Control and Prevention (CDC) in the U.S. Of the 342 cases, 146 (43%) were reported as West Nile meningitis or encephalitis (neuroinvasive disease) and 184 (54%) as West Nile fever, and 12 (4%) were clinical unspecified. Three (3) deaths have been reported.

States: Detailed State information can be accessed through the CDC web site: <http://www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm>

WNV Human Clinical Cases and Asymptomatic Infections, by Province/Territory, by Report week, Canada, 2008

Abbreviations: Newfoundland & Labrador (NL), Prince Edward Island (PE), New Brunswick (NB), Nova Scotia (NS), Quebec (QC), Ontario (ON), Manitoba (MB), Saskatchewan (SK), Alberta (AB), British Columbia (BC), Yukon Territory (YK), Northwest Territories (NT), Nunavut (NU)

¹ Total clinical cases is the sum of both probable and confirmed: WNNS, WN Non-NS and Unclassified / Unspecified

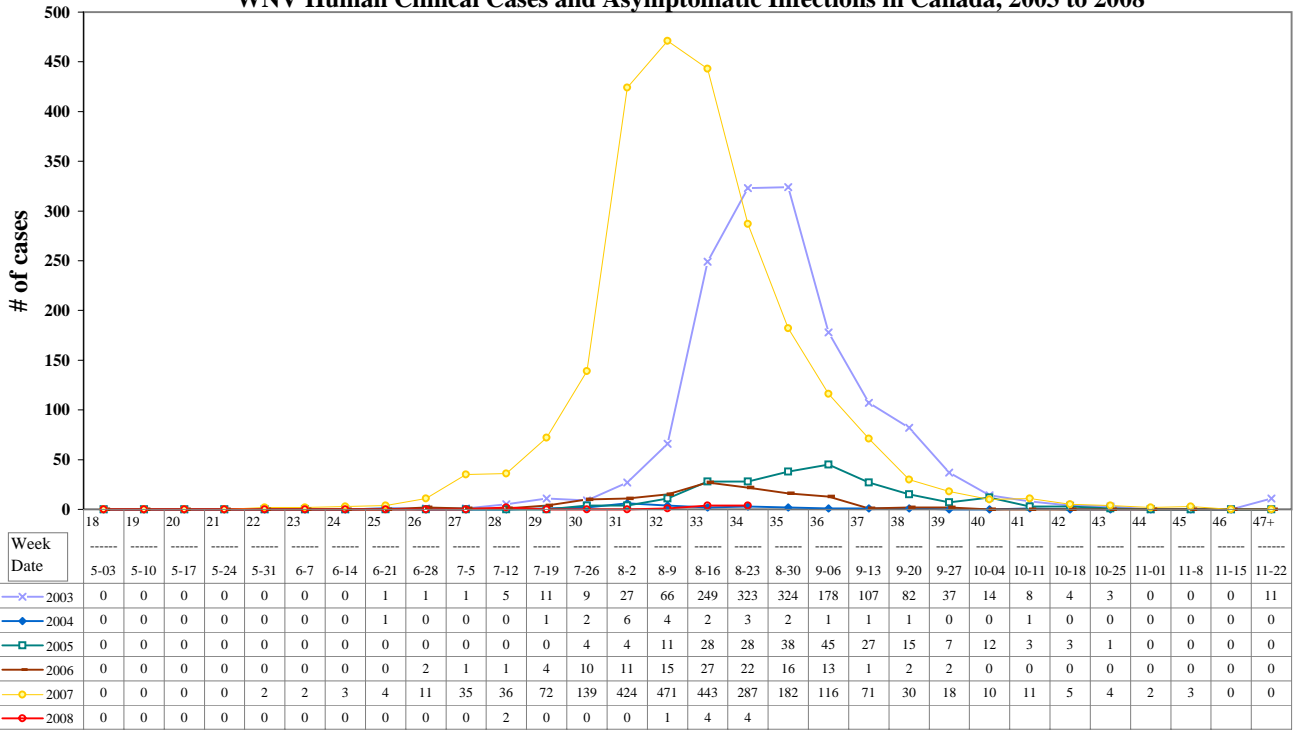

² Likely related to travel outside the province / territory

³ Satisfies West Nile virus diagnostic test criteria IN THE ABSENCE of clinical criteria. This category could include asymptomatic blood donors whose blood is screened using a Nucleic Acid Amplification Test (NAT), by Blood Operators (i.e. Canadian Blood Services or Hema-Quebec) and is subsequently brought to the attention of public health officials. Blood Operators in Canada perform a supplementary WN virus-specific NAT following any positive donor screen test result.

Details on human case definitions can be seen on the PHAC West Nile virus surveillance web site:

http://www.phac-aspc.gc.ca/wnv-vwn/hmncasedef_e.html

⁴ Episode date could include one of the following: symptom onset date, diagnosis date, lab sample date, or reporting date.

⁵ Detailed WNV mosquito surveillance data can be accessed through provincial/territorial web sites.

⁶ These provinces are not conducting mosquito surveillance as part of their WNV surveillance program in 2008.
